

# FG-NET

# Digital Unit for Leak Detection and Location

#### Product Datasheet

- ► Digital, Fully Addressable
- ► Monitoring Up to 500 Sense Cables
- ► Touch Screen Interface
- Instant Locating of Faults
- Integrated Monitoring Software
- ► TCP/IP & MODBUS/JBUS Connection

# Description

The FG-NET digital unit is designed to be used with all TTK digital sense cables, for water, bases, acid and hydrocarbon leak detection.

# In the event of a fault on the sense cables (leak or cable break): Primary responses from the FG-NET:

- An audible alarm is triggered and a relay is activated.
- The touch screen of the panel displays the location of the leak and details of the fault (the type of fault leak or cable break), including the time and date the fault is registered.
- Optional integrated maps of the leak detection installation highlighting the location of the fault, available on the touch screen display of FG-NET.

#### Secondary advanced responses:

- Report to the BMS via a JBUS/MODBUS protocol. The FG-NET can drive dynamic drawings on the host BMS.
- Send email alerts and SNMP traps to a LAN-connected BMS, via a standard Ethernet connection.

# Features & Benefits

#### **FEATURES**

- 7" (175mm) touch-screen gives a clear and detailed indication of the system status.
- User-friendly system Users can customise the system with the sub menus accessible from the home screen, to set up the panel.
- Up to 120 lengths of sense cables (or 1800 metres) can be managed independently.
- The system's reaction time to faults is adjustable cable by cable.
- Temporal isolation (72 hours maximum) a or several sense cables.
- Up to 5000 events stored in the history log.
- Non-volatile memory (SD), for storing user settings and drawings.
- Three types of interface for communication with a BMS available.
  - TCP/IP connection via an Ethernet port.
  - JBUS/MODBUS RS232 or RS422/485 serial links.
  - 9 relay contacts: 8 configurable relays + 1 specific relay for power interruption.
    - Dual relay drive (e.g. 1 for BMS and 1 for solenoid valve);
  - Relay positions are defined by a LED indicator.
- Different security levels to provide maximum security.

#### **BENEFITS**

- Precise location of a leak: to the nearest metre for water and acid leak detection and to the section for oil leak detection.
- Each sense cable is addressable and can be assigned a specific name.
- Multiple simultaneous leaks can be detected (120 cables = 120 alarms).
- Different types of sense cables (for detecting conductive & non-conductive liquids) can be connected on the same panel for a truly bespoke system.
- Cable break faults can be detected (to the nearest cable).
- When a cable break occurs, the system maintains its integrity by continuing to monitor all preceding cables for faults.
- Compatible with existing monitoring systems (Trend BMS etc.)
- Extension and upgrade of the system is easy. No additional power source or zoning panels are required.

# **Touch Screen Menus**

# Four menus available for configuration of the FG-NET :

Setup	Main page for setting up the system architecture, cable isolation and reaction time rules, acknowledge mode, user access, relay status, time zone, language, sound alarm, serial links and network functionalities. An administrator level password is required to access this menu.
Event log	For viewing the recorded alarm history. A maximum of 5000 events can be stored in the event log.
Cables	To give the user a general overview of the site installation. The interactive floor plan can be viewed under this menu as an optional feature.
Help	Provides troubleshooting procedures, contact details of the manufacturer and the reference number of the unit.

Dynamic map shows leak in real time

Easy setup of relays for each cable

User-friendly interface of configuration

# Certificates

FG-NET digital unit meets the TÛV requirements. FG-OD sense cables which are certified by ATEX can be connected to the FG-NET digital unit. All the connections in the FG-NET digital unit must be done with the power supply switched off.
Read carefully the installation procedure for the FG-NET digital unit.
